## ENCLOSURES, CABINETS, PEDESTALS, RTs

### Enclosure Solution

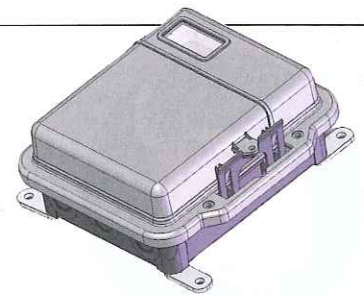

After successfully working with prominent pedestal manufacturers, Oldcastle Precast Enclosure Solutions (OPES) is expanding their product line featuring handholes combined with custom manufactured pedestal covers. Per customer requests, OPES is adding more custom solutions. OPES combines 3 brands -- Carson, Christy, and Synertech -- to provide the strongest, most durable plastic, polymer, and concrete enclosure products available worldwide; they manufacture enclosure products for FTtx/Telecom applications, including industry-approved handholes, splice boxes, and equipment pads. ### Outdoor Cabinet Solution

Purcell FlexSure® Series, FLX12 WS, is suited for wireless data broadband backhaul applications supporting 3G/4G service deployments. Is a highly-configurable, GR-487 certified outdoor cabinet solution with advanced thermal management capabilities including Zone cooling. Has a compact footprint with a variety of mounting options, including unique cabinet-on-cabinet vertical stacking to maximize available footprint. Applications include FTTC/S/N, DSL, Broadband Loop Carrier as well as LTE, Node B, and Wi-Fi/WiMAX. Module design allows customers to adapt the configuration as needed for additional electronics, thermal management, and battery backup. Purcell Systems Inc. is a global designer and manufacturer of integrated outdoor cabinet solutions, featuring advanced thermal management systems, and intelligent site support solutions for a variety of wireless and wireline applications.
